* As Needed								
<p>This long-term course schedule is provided to assist students in planning their schedules. We will make every effort to offer the courses as listed; however, we cannot guarantee that a course will be offered as outlined here. The scheduling of courses during the summer depends on faculty interest and availability; consequently, the schedule is often subject to change even after the printed schedule appears. Although there is no specific plan for offering courses during the summer, it is reasonable to assume that one or more sections of Psy 201 (Introduction to Psychology) will be offered as well as one or more upper-division course. We cannot predict the particular sessions in which any classes may be scheduled. Finally, the department has no plans to offer either Psy 303 or Psy 353 (Research Methods & Statistics I and II) during any summer sessions.</p> <p>9/26/09</p>
