Updated 08/11/2017

*12 month reporting for Job placement rate began with 2014 JRCERT Standards

** Job Placement rate is based on a 5-year average and not an annual benchmark

***The Job placement rate is defined as the number of graduates employed in the radiologic sciences compared to the number of graduates actively seeking employment in the radiologic sciences. The JRCERT has defined not actively seeking employment as:

- a. graduate fails to communicate with program officials regarding employment status after multiple attempts,
- b. graduate is unwilling to seek employment that requires relocation,
- c. graduate is unwilling to accept employment due to salary or hours,
- d. graduate is on active military duty, and/or
- e. graduate is continuing education.
- f. USI uses self-reporting for employment statistics

**** Credentialing examination pass rate has been defined as the number of graduates who pass, on first attempt, the national credentialing examination compared with the number of graduates who take the examination within 6 months of graduation
