

## How to Take Pictures of a Group

[Print](#) | [Close](#)

Sometimes, it takes a little more than getting everyone to smile at the same time to get a great group photo.

---

### Use different levels

The eye likes variation, so get some people sitting, some kneeling, some standing. Use props like a staircase to stagger height.

---

### Look down

Change the view by standing on a chair, ladder, or balcony to shoot down at the group for a more interesting perspective.

**Give them something to do**

Depending on the occasion, have them jump at the same time, or throw a ball up and have them watch it.

---

**Eyes open, people**

Have everyone close their eyes until you say, open! taking the photo as you say it.
