#### **PROJECT DESCRIPTION**

#### NEW CONSTRUCTION – SCIENCE/EDUCATION CLASSROOM BUILDING

#### Budget Agency Number: G-0-97-1-01

#### **Project Description**

In its 1999-01 capital budget request, the University sought \$21,600,000 of bonding authority to construct a Science/Education Classroom Building. In reviewing that request, the Commission for Higher Education recommended that the project be broken into two phases, with Phase One funding of \$12,600,000 provided in 1999-01. The 1999 General Assembly followed the Commission's recommendation and authorized Phase One bonding of that amount. The University requested Phase Two funding to complete this project as the top priority in its 2001-03 capital budget request.

The University expects to delay construction until funding for both phases is available. That will facilitate construction of a single integrated facility rather than a Phase One facility and a subsequent Phase Two addition.

The following infrastructure and site development steps will be completed in preparation for the new construction:

Total Project Development	\$3,418,801
Design Fees and Expenses	<u>1,076,801</u>
Site Preparation	1,245,000
Estimated Electrical Construction Cost	272,000

#### **PROJECT DESCRIPTION**

#### **NEW CONSTRUCTION – STUDENT RESIDENCE BUILDING NO. 3**

#### Budget Agency Number: G-0-00-1-02

#### Project Description

The University of Southern Indiana proposes the construction of a student residence building with a combination of one and two-bedroom apartments. The residence building, with fifty-two (52) two-bedroom apartments and twelve (12) one-bedroom apartments, will accommodate two-hundred twenty (220) students and will be located in a wooded area south of the Physical Activities Center. The proposed facility is the same general design as the first two suite-style facilities, Newman Hall and Governor's Hall. However, several improvements and enhancements have been incorporated into the architectural design of the project, including the addition of a lower (basement) level.

The three-story building will include a central entrance with interior corridors, a centrally located lounge and reception area, a computer laboratory on each floor, a laundry facility, and a multipurpose room. The two-bedroom units with two bathrooms will accommodate four students and the single units with one bathroom will accommodate one student. The total square footage of a two-bedroom unit is approximately 725 square feet with approximately 530 square feet in the one-bedroom unit. Each apartment will include a kitchenette, a common living area for the residents, and technological enhancements for computer networking. The basement level will contain ten student apartments and an unfinished area for future use.

The construction of the building will be a combination of wood framing, masonry block walls where needed for fire blocks, brick exterior, gypsum board walls and ceilings, and light weight concrete floors.

#### 2001-03 CAPITAL IMPROVEMENT BUDGET REQUEST SUMMARY

The University of Southern Indiana's Capital Improvement Budget Request for the 2001-03 biennium proposes completion of the Science/Education Classroom Building, expansion of the David L. Rice Library, and improvements to the campus roadways. The University of Southern Indiana Board of Trustees and Administration are pleased to present the Capital Improvement Budget Request for 2001-03 for review by the Indiana General Assembly, the Commission for Higher Education, and the State Budget Agency.

The University's number one capital priority for the 2001-03 biennium is funding for completion of the Science/Education Classroom Building. The 1999 General Assembly provided \$12,600,000 of bonding authority for Phase I of the project. The University seeks Phase II support to complete construction of the facility. The Science/Education Classroom Building will provide general and specialized classrooms, computer, multi-media, and teaching/research laboratories for the Schools of Science and Engineering Technology, Education and Human Services, and University Division Advising and Academic Skills. Construction of the building is needed to support increased student enrollment and program expansion in science and education; promote collaboration to incorporate modern instructional technology into the science, mathematics, and teacher education curricula; and to increase student retention with improved academic and support services.

Expansion of the David L. Rice Library is the University's number two capital priority. The project will provide additional library space, general purpose classrooms, programming and office space for Academic Affairs division, and additional space for Central Stores and Distribution Services. The University's third priority is for Special Repair and Rehabilitation funds for Phase I of the Campus Entrance/Roadway Relocation Project. This safety-related project will improve the intersection and flow of traffic at the University's main entrance and primary roadway.

The University of Southern Indiana's 2001-03 Capital Improvement Budget Request is consistent with the long-range plans of the University, the mission of the University, and the economic needs of the State of Indiana. In the past ten years, enrollment at the University has increased by 52 percent from 5,713 students in fall 1989 to 8,695 students in fall 1999. A notable change in the student population is the 76 percent increase in the number of FTE students from 3,892 in 1989 to 6,846 students in 1999. Also, more than 8,500 adults and youth enroll annually in noncredit, continuing education, workforce training, and professional development programs at the University. The rapid growth in student enrollment has resulted in a serious deficit of classroom, laboratory, and office space.

The need for additional academic space in the near-term was identified in the 1996 Campus Master Plan. Even with the completion of the Liberal Arts Center in fall 1999, there is a significant space deficit of over 200,000 assignable square feet. Construction of the Science/Education Classroom Building and expansion of the David L. Rice Library are needed to maintain the quality of the University's educational programs and necessitated by the University's expanding enrollment. The Campus Entrance/Roadway Relocation Project Phase I results directly from issues related to safety, with increased numbers of pedestrians and increased vehicle traffic. The future needs for the physical development of the campus are identified in the University's Ten-Year Capital Improvement Plan for 2001-2011.

The following charts, Fall Student Headcount Enrollment and FTE Enrollment 1989-2007, FTE Enrollment v. Academic/Administrative Assignable Square Feet, and Projected Academic/Administrative Space Needs Per FTE Student: 1997-2010, illustrate the anticipated increases in student enrollment and the space requirements needed to serve the students of the University of Southern Indiana. Detailed explanations of the projects requested in the 2001-03 Capital Improvement Budget Request are provided in the accompanying documentation.

# 2001-03 CAPITAL IMPROVEMENT PLAN

The Capital Improvement Budget Request for 2001-03 is detailed on Schedule A and asks approval and funding for the following projects:

#### ACQUISITIONS

No requests for Acquisitions for 2001-03.

#### **MAJOR EQUIPMENT**

No requests for Major Equipment for 2001-03.

#### GENERAL REPAIR AND REHABILITATION AND INFRASTRUCTURE

This Capital Improvement Budget Request asks for funding and approval of several general repair and rehabilitation projects totaling \$1,200,000. The repair and rehabilitation projects planned for completion in the 2001-03 biennium include the following:

- Replace Boiler No. 2 in Central Heating and Cooling Plant
- Replace east one-half of the roof on Murphy Auditorium
