★ Sequencing

Excellent job with sequencing at the beginning of your lesson! You started with relatable examples about storytelling that connected to students' prior experiences before introducing the concept of fluency. "So when you're listening to someone read you a story, maybe your mom or a teacher or anyone, do you want them to read the story? Like, hi, My name is Ms. Weininger and I have a dog named Huxley." This progression from familiar experiences to new concepts creates a strong foundation for learning.

I like that I did this because I feel it is a great way to introduce the topic of fluency to the students by allowing them to form their own definition on what fluency is

★ Sequencing

Wonderful sequencing when teaching about punctuation marks! You first established what fluency is, then explained how punctuation guides expression, and finally moved to examining specific punctuation marks one by one. "So like I said, fluency is expression and constant speed. There's all kinds of expressions we can use when we read. Does anyone have

feedback helps students develop a richer understanding of the concept.

Critical Questioning

You could enhance your questioning during the punctuation practice activity by asking students to explain their reasoning more deeply. For instance, when Savannah identified the question mark, you could ask: "How might this sentence sound different if it had a period instead of a question mark?" or "Why do you think the author chose to use a question mark here?" This would push students to analyze the purpose and effect of punctuation choices rather than simply identifying them, leading to deeper understanding of how punctuation affects meaning.

Modeling clearly shows the students what is expected of them and how to do it properly.

Pacing

You could consider having a backup plan for technical issues to maintain lesson momentum. During the technical interruption, students lost focus and valuable learning time. "Hello? Hey, can you hear me? Yeah. Okay, let me see. I can't see you for some odd. Oh, wait, there you go. Now I can see you." Having a quick transition activity ready would help
