Who We Serve

- College of Medicine
- College of Nursing
- College of Pharmacy
- College of Allied Health Sciences
- UC Health
- Undergraduates and General Public
Renovation

• 2004
• Planning
• Student input
• What a difference in just a few years
• 2008
Henry R. Winkler Center

- Monographs & Serials
- Archives
- Patient Records
- Museum pieces
- Art
- Medical Instruments
You Raised HOW MUCH MONEY?????

• A Project Plan comes together
• Summer of 2010 until June 12, 2011
Prior Work

• Since 2000 had been sending pre 1990 imprints to SWORD
• Withdrawing duplicated UC holdings
How Much Space??

• Estimated that we needed to withdraw approximately 50% of our bound serials collection
• Administration would be happier with more, to provide space for students
The First Problem

- Wright State closed their Medical School Library and sent their journals to storage
- Many titles slated to go to SWORD were now duplicates
Second Problem

- Former serials librarian forgot/did not realize that Miami University’s holdings might also duplicate HSL’s holdings and those were not checked.
- Essentially, all of her work was for naught
Journal by Journal

- Pull off the first volume in the run and note the full holdings on a card
- Search OhioLINK Central Catalog to identify holdings at SWORD from Miami and Wright State. Note if any volume gaps were indicated.
Process cont.

• THEN…..
• Go to Serials Solutions page and check for electronic access.
• Note if it duplicated or exceeded the print
The Decision

- If our title was represented in SWORD
- OR
- Was available electronically the spine was marked with a Black X
- .....and reshelved and the rest of the run also X-ed for withdrawal
One last task

- STATISTICS – OOPS, we almost forgot
- Going through the stacks and counting the X-es
- Finding surprises
Contractors – A Girl’s Best Friend

- Plane’s Moving and Storage
- University Movers
- RDT Concepts
- UC Project Services
Time Line

- Boxing – June 13-16, 2011
- Moving and Shifting – June 16-22
- Shelving Reassembly – June 22-28
- Construction – June 16-August 31
- Winkler Move – September 6-Oct.8
Student Space Needs

- Flexibility
- Windows
- Tables
- Electricity
Impact on ILL/Doc Del

• Immediate Problems
  – Alphabetization of shifted journals (movers don’t really know their alphabet)
  – Communication between staff and student assistants
  – Faculty hadn’t been told about the change to library holdings and space before they left in June
Other ILL Issues

• Lack of current holdings information in OCLC and SerHOLD
• Lack of current holdings information in local catalog
• Need to search multiple sites to figure out where to borrow

Abstract:
BACKGROUND: The long-term efficacy of psychological treatments for binge eating disorder remains largely unknown.
AIMS: To examine the long-term efficacy of two patient group cognitive-behavioral therapy (CBT) and group interpersonal psychotherapy (IPT) for binge eating disorder and to analyze predictors of long-term non-response.
METHOD: Ninety people with binge eating disorder were assessed 4 years after treatment cessation within a randomized trial (trial registration: NCT01298272).
RESULTS: Participants showed substantial long-term recovery, partial remission, clinically significant improvements and significant reductions in associated psychopathology, despite modest tendencies in single secondary outcome. Body mass index remained stable. While the CBT group demonstrated an improvement in eating disorder symptoms over the follow-up period, the CBT group reported a worsening of symptoms, but treatments did not differ at any time point.

</table>
However…

• Quickly became a net borrower
• Local users annoyed because taking longer to get materials we used to have in-house
Impact on Technical Services

• Holdings updating in multiple systems plus keeping up with regular work
• Lack of staff
• Statistics reporting – LARGE negative numbers make administrators nervous
Where Are We Now?

- Buying *almost* exclusively electronic format for journals
- Continue to focus staff resources on updating holdings information locally and nationally
Where Are We, part 2

• Participating in SWORD de-duplicating project.
• Work with current students to configure and furnish the space to fit their needs
• Monograph weeding
But Most of All

Stay Sane
Stay Relevant
