

General responsibilities of Internship site

I will conduct business at the RFWC on the USI campus as all positions throughout my internship. I will range from welcome greeter to manger throughout my course of the practicum class. Welcome greeters are the face of the building as they are the first one you see and they will also check out items from them. Consultants will help anyone if they have any questions about weightlifting or if they have any questions about the cardio equipment. Next, the laundry attendant is somebody who maintains the towels and polos for the facility so that everyone can continue to use them throughout the day. Finally, the manager is someone who leads the positions listed above. They help maintain communication and a healthy flow of the facility.
