

INTERNATIONAL CLUB

Sakura Sakakibara

Sophomore, Computer Science major

One of the goals of the International Club is to involve international students with American culture and American students. Most international students that come to USI become members of this club. We have many fun activities and events on and off campus. Our first event starts on the first weekend when new students arrive from their countries.

During holidays and breaks, we travel around the United States to places like St. Louis, Chicago, Florida, and Washington D.C. Not only do we learn about American culture, holidays, and history, we also have a lot of fun and make friends who become like family. Even after they return to their countries, we still keep in touch and talk about our memories during the trips.

We also have awesome events on campus and outside the university. One of the biggest events is the annual International Food Expo in February. During this event you can enjoy traditional international food from more than 20 countries and enjoy performances, such as dancing, singing, and playing of musical instruments.

Now we are preparing for Food Expo 2018. More than 60 international and American students are working together for the success of this event!

If you have the chance to study at USI, join the International Club and you will really enjoy USI life with your international family!
