Program description

This年度 conference will focus on the cutting-edge health information and innovative solutions needed to take healthcare delivery to the next level. Through insightful discussions and engaging presentations, leading experts will share emerging trends in the use of health information technology in direct patient care, security and privacy, health information exchange, data analytics, and data modeling.

Purpose

The purpose of this program is to prepare health professionals to implement effective health informatics strategies in their individual professional practice and their organization.

Target audience

Physicians, nurses, pharmacists, informatics professionals, medical practice managers, healthcare managers, health professionals, students, and others whose scope of practice is related to health informatics.

Questions

812/464-1803 or 800/467-8600
extera@usi.edu

Barrierfree location

Cost:

$99, $20 for undergraduate students, if registering by January 15, thereafter, $115, $30 for undergraduate students. Materials, contact hours, lunch, and refreshments included.

Refund Policy:

Registration fees are refundable, less a $15 service charge, until January 28, 2014. No refunds will be made after that date.

Location of Conference:

The conference will be held in Center I at University Center at the University of Indiana, Evansville, Indiana. U.S.I. is located on Highway 62, two miles west of Evansville.

Hotel Accommodations:

Overnight accommodations are available at the Fairfield Inn West by calling 812/429-0600 or at the Holiday Inn Express at 812/427-9777.

Attendance List:

If you do not wish to be included on an attendee list, call Jennifer Hendel in Outreach and Engagement at 812/466-5463 with your name, conference name, and phone number.

8:15 a.m.  Welcome
Carter Hall D

8:15-9:15 a.m.  The Power of Stickers
Regina Holliday
From electronic medical records to street art and Twitter hashtags, Regina Holliday will take attendees through a story that promises to stick within the heart and mind. Her speech will inspire listeners to imagine the possibilities of true patient and family participation in Health Information Technology (HIT).

9:15-9:30 a.m.  Break

9:30-10:30 a.m.  Concurrent Session 1

Carter Hall D
HCFA218
Electronic Patient Engagement Comes of Age
Dr. Susan K. Newbould, MD, FACP, FHM, is an educator specializing in Healthcare Informatics and the director of the Nursing Informatics Core Course. She has over 30 years of experience in the vendor, consulting, academic, and hospital worlds, primarily in informatics.

UC218
The Promise and Perils of Personal Information in Healthcare
Information privacy and security are daily challenges for providers who seek to obtain the advantage in HIT.

10:40-11:40 a.m.  Luncheon

11:40 a.m.-12:40 p.m.  Concurrent Session 2

Carter Hall D

UC218
Global Perspectives on Healthcare Informatics
Sue Newbould, PhD, RN, BC, FAAN, CHIT-CP

UC2219-2220
How Can We Make Data Speak? Generating meaning from information for patients, providers, and payers.

2-3 p.m.  The State of Health Information Exchange
Keith Kelley, MBA
This presentation will describe the benefits and challenges of HIE progress in Indiana and across the country, much of which has been influenced by government funding and guidance.

3:15-4:15 p.m.  The Future of Health Informatics—Don’t Blink
Robert Hoyt, MD
Evolution of the field of health informatics to include electronic health records, mobile technology, telemedicine, health information exchange, bioinformatics, and potential obstacles

4:15-4:30 p.m.  Presentation of painting inspired by the conference and completed during the conference and closing remarks
Regina Holliday

Keynote Speaker:

Regina Holliday is a Washington, DC-based patient advocate and artist known for painting a series of murals depicting the need for clarity and transparency in medical records. This advocacy mission was inspired by her husband Frederick Allen Holliday II and his struggle to get appropriate care during 11 weeks of hospitalization in two facilities. After his death from kidney cancer on January 17, 2009, she began "73 Cents," a mural depicting her husband dying in darkness surrounded by inaccessible technological tools in a closed data loop. The title refers to the cost per page for medical records in the state of Maryland.

Holliday's artwork became part of the national healthcare debate and was reported on in the mainstream press, as well as reviewed by such journals as JAMA and NEJM. She began an advocacy movement called "The Walking Gallery," for which medical providers and advocates wear "patient story" paintings on the backs of business suits. She recently authored "The Walking Wall: 73 Cents to the Walking Gallery."

Backed by her own patient and caregiving experiences, Regina Holliday reveals the global heralding of her message of patient empowerment and inclusion in healthcare decision-making. She fearless stands before officials and practitioners demanding a thoughtful dialog on the roles patients play in their own healthcare.

Speakers:

Fred H. Cole, JD, distinguished professor, Center for Law, Ethics, and Applied Research in Health Information, Indiana University, has written, taught, and conducted extensive research, and consulted in the field of health information for 24 years.

Jeff Donnell is an independent health information exchange expert. He has written and spoken extensively on the topic of health information exchanges, and has been involved in the design and implementation of electronic medical information systems for providers and consumers.

Dr. Robert Hoyt is a board-certified internist and the director of the Informatics Program at the University of Washington Hospital and Clinics. Dr. Hoyt has been involved with clinical research for the past 25 years.

Jasone Jones, RN, PhD, is director of the Informatics Program at the University of Alabama at Birmingham, and has published extensively on the topic of health information exchanges.

Mike Wade, MS, is a healthcare informatics professional and manager of clinical informatics at Deaconess Health System focusing on improving hospital operations and outcomes through interdepartmental collaboration, standardization, and leveraging of electronic health record systems.

Sunny Lu Williams is a supply chain and technology professional with over 20 years of experience in bridging healthcare gaps through technology, telecommunications, and direct patient logistics. She is the Vice President of Operations and Innovation at MedMan Corporation, a 3000+ supply chain and technology deployment company headquartered in Cornelia, Indiana.

Planning Committee:

Chairperson: Gabriela Mustata Wilson, PhD, MSc
Assistant Professor of Health Services, University of Southern Indiana

Rosalie Baich, MSN, RN
Instructor of Nursing, University of Southern Indiana

Jeanne Braun, MSFS, RN, NE-BC, ONC, CFCM
Executive Director of Clinical Informatics, St. Mary's Medical Center

Joan Edor-Ozok, RN, CNE
Assistant Nursing and Simulation Coordinator, University of Evansville

Peggy Gudik, MSN, RN
Assistant Professor of Nursing, University of Evansville

Karen Jones, MSN, RN
Director of Online Continuing Education for Health Professionals, University of Southern Indiana

Elizabeth Kall, PhD, HSP, MBA
Assistant Professor and Clinical Professor of Family Medicine, Indiana University School of Medicine–Evansville

Brian L. McGuire, PhD, CMA, CPA, CMA, CIPR
Associate Dean, Director of Accounting Programs, Professor of Accounting, University of Southern Indiana

Ruth Mager, MBA, IA, IS
Instructor of Education and Coordinator of Interprofessional Education, University of Southern Indiana

Kevin Valdovinos, PhD
Assistant Professor, Program Director of Health Informatics, University of Southern Indiana

Kathryn Stinson-Kelly, MSHA
Assistant Professor, Ivy Tech Community College

Mike Wade, BS, MS
Manager of Clinical Informatics, Deaconess Health System

Frank Ward, EdD, MBA, PA
Health Informatics Program Director, University of Southern Indiana

Anita White, PhD, RN, MBA, NE-BC
Dean, College of Nursing and Health Professions, University of Southern Indiana

2-3 p.m.  The State of Health Information Exchange
Keith Kelley, MBA
This presentation will describe the benefits and challenges of HIE progress in Indiana and across the country, much of which has been influenced by government funding and guidance.
